

It Just Gets Better

KIT COLLECTIONS

To help customers cut costs and increase productivity, TaeguTec is launching three new tooling kits, the TEST KITS, SELLING KITS and FOLLOW KITS

The KIT COLLECTIONS include new **GOLD-RUSH** products and specific TOP products from the previous KIT COLLECTION brochure covering a TaeguTec range of cutting tools

- The TEST KITS enable users to review product performance prior to placing a mass-purchasing order
- The SELLING KITS are for trial order and the bill of materials are comprised by holder and Inserts
- The FOLLOW KITS
 - For mass production environments where inserts are available as a bundle pack
 - Can adopt different prices according to package size classification type

The ordering will be controlled based on the catalogue number product Description reference

* If you want performance information on the KITS and FOLLOWS ets, please contact TaeguTec staff or nearest sales office or distributor

Designation System

TestKits

¹ KIG(T, R)² T-CNMX-HB⁴ TT8115 M25

¹ KIG; Gold Rush Product Kit KIT; Top Product Kit KIR; Rhino Rush Product Kit

² T; Test Kit ⁴ Designation

SellingKits

¹ KIG(T, R)² S-CNMX-HB⁴ TT8115 M25

¹ KIG; Gold Rush Product Kit KIT; Top Product Kit KIR; Rhino Rush Product Kit

² S; Selling Kit ⁴ Designation

FollowKits

¹ KIG(T, R)² F-A³ -CNMX⁴ 160712HB 8115

¹ KIG; Gold Rush Product Kit KIT; Top Product Kit KIR; Rhino Rush Product Kit

³ Packing size A, B, C, D type; classified differently depending on quantity

² F; Follow Kit

⁴ Designation

*Ongoing R & D is what drives Business Growth at TaeguTec
- 60% of sales are from products less than 5 years old*

Size Technology

- Exceptionally stable machining credit to bi-directional clamping forces over the existing standard ISO lever holder's uni-directional clamping force
- Excellent productivity and longer, stable tool life in high feed machining applications
- Optimal performance in interrupted cutting in weak/old machine set-ups
- Extended insert tool life credit to next generation clamping system

TURN•RUSH

For semi heavy turning

- Low cutting forces and an optimized chipbreaker suitable for semi heavy machining
- Hook lever clamping system gives unique contact surface with large convex
- Double sided insert
- Unique insert and shim profile offer maximum stability in semi-heavy machining
- 3 dimensional geometry that is exchangeable with the ISO standard holder

T-TURN CBN grades - TB670

Excellent cutting performance for hardened steel and cast iron

- High hardness and impact resistance
- From continuous to severe interrupted turning
- For alloy steel, tool steel, case hardened steel and chilled cast iron

HEX-TURN

12 Cutting Edges For Economic machining

- Excellent tool life compared to general turning inserts
- Strong cutting edge and excellent chipping resistance (continuous & interrupted) with 120 degree cutting edge
- Stable clamping by T-Type holder

COMBICLAMP

Multi functional clamp system

- **Compatibility:** Applicable to the existing T-Holders when clamp is changed
- **Versatility:** 3 different types of insert for one T-Holder
- **Durability:** The new carbide clamp shows better wear resistance compared to existing cast iron machining applications
- **Stability:** Due to the gap adjusting structure in the insert's contact area, it proves much stronger with a stable joint force

TOPFEED

For high feed machining

- Improved tool life for turning: Double sided and 6 cutting edges
- Optimized chip-breaker geometry: Suitable for high feed machining
- Stable contact surface with seat: Due to unique contact surface with large convex
- Exclusive seat: 3 dimensional geometry
- Ultra high feed machining condition: Max feed rate=3.0mm/r, Max D.O.C=2.5mm
- Quick change and rigid clamping force: Due to hook lever clamping design

TOPMINI

Ground positive ISO inserts for high precision turning

- High precision is guaranteed with the peripherally ground geometry
- Low cutting forces due to the dynamic inclined sharp cutting edge with a wide groove geometry
- Excellent chip control at low feed rates and depths of cut, credit to an optimized corner chip-breaker design
- Suitable for swiss sliding head turning centers with its soft cutting and excellent surface finish Small corner radius size: R0.1, 0.2 and 0.4mm

Taegu Clamp

QUAD•RUSH

T-CLAMP

TOPMICRO

QUAD-RUSH

4 cutting-edges with chip former for grooving, parting and recessing

- 4 edges with a J type chipformer
 - Excellent chip control and high quality surface finish grooving
- 3 contact points with side lock torx screw
 - Accurate positioning of insert when indexing
- 4 cutting edges means even if edges are broken any remaining edge can be used

T-CLAMP

For small ID turning and grooving

- Economical double-ended insert
- Strong clamping with fully supported seat
- Internal coolant through the shank
- Multiple applications
 - TDIM: pressed insert with efficient chipformer for boring and grooving operation
 - TDIP: ground insert for precise machining
 - Internal machining from Dmin 12.5mm
 - Special insert for threading and profiling are available on demand

TOPMICRO

Internal turning, profiling, grooving, threading, chamfering and face machining of small diameters

- Internal machining from \varnothing_{min} 0.6mm
- Best solution for internal turning, profiling, grooving and face machining especially on small diameters
- TiAlN coating for extended tool life
- Shank diameters - \varnothing 4mm & \varnothing 7mm
- Internal coolant through the body directly to the cutting edge
- Promotes better chip evacuation and longer tool life

Taegu Drill

DRILL•RUSH

TOPDRILL

T-TAP

New Head-Changeable Drill

- Quick Change System: The innovative clamping mechanism with special key enables head indexing on the machine easily
- Flexibility: A series of differently sized head diameters can be coupled with a drill body
- Twisted Coolant Channel: Chip evacuation is improved
- Smooth Chip Flow: Optimised & polished chip gullet guarantees excellent chip evacuation
- Rigid connection: Innovative head clamping system with rigid connection improves performance and increases the number of head indexes
- New Grade TT9080: New grade with multiple layer structure prolongs tool life

TOPDRILL

New generation of indexable drill

- 4 cornered economical insert design
- The same insert is applicable for both internal and external pockets
- Improved machinability due to ideally configured cutting edge
- Applicable to all kinds of materials including low carbon and mild steel
- The twisted type coolant design enabling excellent chip evacuation and high precision hole making
- Enhanced insert durability with new grade (TT9080)

T-TAP

Tapping Kits

- ISO(metric standard) thread tapping from M4-M14
- 2 types: through hole & blind hole tapping kits
- Pre hole drilling: Solid carbide drill for M4-M8 thread and DRILL RUSH indexable drill for M10-M14 thread
- Through hole tapping kits: chamfer integral drill for both the solid carbide type and DRILL RUSH indexable type
- All taps for kits are TiN coated grade for tapping a wide range of materials
- Follow kits available for all taps of test kits

CHIP SPLITTER INSERT

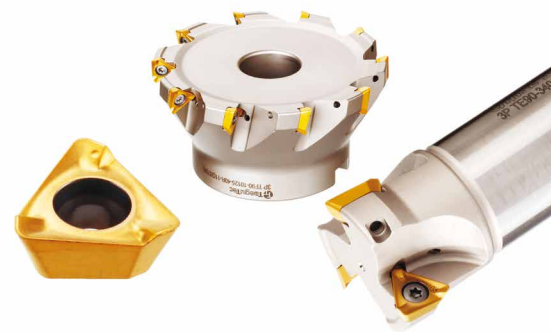

MILL-RUSH

Super high positive insert with 3 cutting edges

Cutter

- ❶ Internal coolant supply
- ❷ Cutter bodies do not require modification for insert mounting with corner radius
- ❸ High relief for ramp-down application
- ❹ Unique angled screw clamping gives increased insert stability
- ❺ Helical cutting edge for 90 degree cutting

Insert

- ❶ Thick & unique geometry for high strength cutting
- ❷ Wiper for superb surface finish quality
- ❸ Super high positive axial rake for low cutting force
- ❹ Innovative cutting edge geometry for effective chip evacuation

Double sided positive insert with 6 cutting edges

Cutter

- ❶ Internal coolant supply
- ❷ Helical cutting edge for 90degree cutting
- ❸ Dovetail mechanism clamping provides increased security and insert clamping

Insert

- ❶ Thick & unique geometry for high strength cutting
- ❷ Wider wiper flat gives the best surface finish
- ❸ Positive axial rake for low cutting force and smooth cutting
- ❹ Peripheral ground type for high precision machining
- ❺ Double sided 6 corner insert with helical geometry

CHASEALU

High speed aluminum machining

- Exceptional productivity for aluminum and non-ferrous material machining
- Can be applied to rough and finish machining
- Various corner radii from R0.4mm to R5.0mm available
- Secure, stable and unique “V” bottom insert design
- No movement during high ramp machining

CHASEMOLD

New cutter with strong inserts

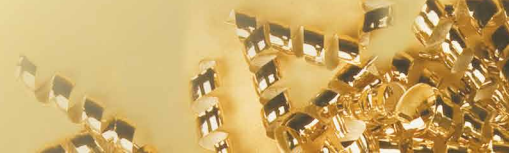

For contour, copy and radius milling in Mold & Die applications, the benefits are:

- More insert thickness & its more strong screw system of New ChaseMold line for heavy or demanding applications
- Reliable machining even under difficult conditions
- Long tool life through optimum geometry of inserts
- Anti-Rotating system

High feed cutters

- Particularly suitable for High Feed Machining
- Low cutting forces
- 4 corner inserts for cost effective machining
- Excellent chip evacuation
- Through coolant (air) system
- Low chipping tendency
- Minimum Diameter 16mm

- 90 degree cutter with 4 corner indexable insert
- High density cutter maximize productivity
- High positive cutting edges - Soft cutting action
- Negative insert with thicker design - Stable and reliable performance
- Ground edge & top polished insert available for aluminum machining
- All cutters are coolant delivery option

Additional cutter option: Chase2Mill AN16 line 45° entry angle

- Combination of high positive insert with exact 45° entry angle: extremely smooth and silent cutting action
- High helix 4 corner insert
- Excellent surface finish with wide wiper flat
- Maximum 8.4mm depth of cut
- Full ground periphery

Economical double sided insert

- Unique double-sided round inserts available in two types (shredded and regular continuous cutting edge)
- Unique insert and cutter pocket structure for strong & robust clamping (Anti-rotating system)
- Free cutting geometry for all materials
- When machining with a long overhang cutter, it is recommended that the shred type insert is used to reduce the cutting load with effective chip split into small, manageable pices

New cutter with 14 cutting edges

- 14 corners-45° entry angle with economical double sided inserts
- Ideal solution for high performance cast iron and steel machining
- Dual usage insert for both cutter types; a screw type cutter for steel machining and a wedge type cutter for cast iron machining
- Efficient and smooth machining due to positive cutting edge geometry that lowers cutting loads during rough machining
- Ideal solution for rough machining of automotive components including cylinder blocks, bed plate, manifold, turbo charger, connecting rods, knuckles, carriers etc

CHASE² QUAD

For heavy machining

- 8 cutting edges per insert for economical machining
- Maximum depth of cut 8.8mm with 45° entering angle
- Diverse cutter types for various applications

TRIOBALL

High feed rough ball

- Effective 3 flute design enables high feed machining to enhance productivity
- Unique double-sided insert with 2 cutting edges
- A highly stable cutting performance with thick cutting edges
- Excellent chip evacuation with a coolant hole
- Dovetail mechanism clamping provides increased security and insert clamping

FINEBALL

Profile machining

- The Fineball's optimized design demonstrates excellent run-out and precision
- Its internal coolant system offers unique coolant flow with excellent chip evacuation and better tool life
- The cutter's design enhances rigidity and clamping power via an enlarged area between it and the insert
- Fineball inserts asymmetric structure is designed for accurate clamping
- High helix cutting edge –SM inserts promote smooth, stable high speed machining of hardened steel
- General cutting edge –FM inserts offer better accuracy and best performance in general machining

DUETBALL

AN EXCELLENT CHOICE FOR ROUGH & SEMI-FINISH PROFILE MILLING

- Dovetail mechanism clamping provides increased security and insert clamping
- High helix cutting edge for smooth milling
- Ground insert for excellent high precision
- Economical double sided insert
- Inserts are applicable for both internal and external pockets making it easier to control inventory
- The direct cooling system and good chip evacuation extends the tool's life
- Standardization from minimum diameter 16mm, 20mm, 25mm, 30mm to 32mm in end mill and modular types

CHIP SPLITTER INSERT

for **CHASEMILL & CHASE²MILL** Line

New chip Splitter insert for top productivity with reduced cutting force

- Chip splitter type insert reduces cutting load
- Reduces cutting load – High table feed can be achieved
- Reduces vibration (chatter free) and noise
- Improves chip evacuation (Chip split into small pieces)
- Suitable for long overhang machining (weak machining and fixture applications)
- High depth & width of cut
- Mountable on all standard cutter lines without any modification
