TT2510

New Milling Grade for Hardened Steel

New Milling Grade for Hardened Steel

FEATURES

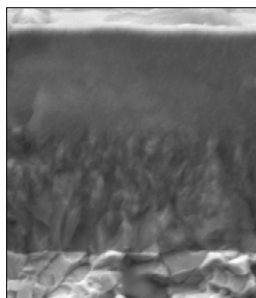

- **Optimal solution for hardened steel, pre-hardened steel and tool steel (40-60 HRC)**
- **Ultra-fine grains size substrate with PVD coating layer for excellent toughness and hardness**
- **High wear resistant coating**
- **High oxidation resistant coating**

TaeguTec has launched a new high wear and oxidation resistant milling grade to provide shops in the Die & Mold, general and heavy industries with the latest innovative TaeguTec insert grade available.

The PVD coated TT2510 milling grade is an ultra-fine grain size substrate that enhances the insert's high wear and oxidation resistant characteristics.

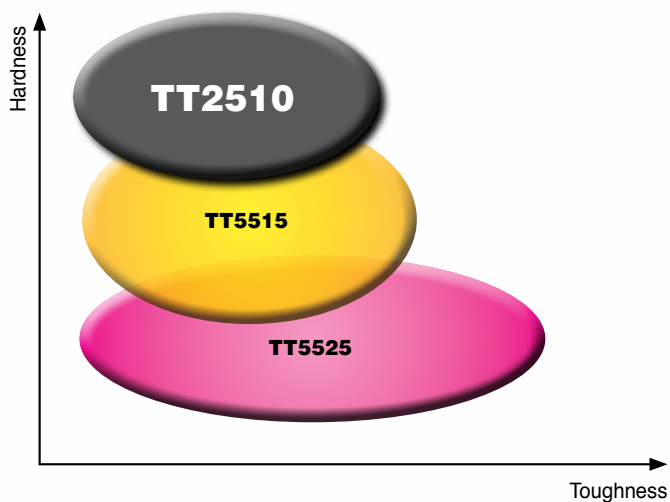

TaeguTec's new TT2510 milling grade is optimally suited for end users machining hardened steel, pre-hardened steel as well as tool steel.

TT2510 substrate and coating

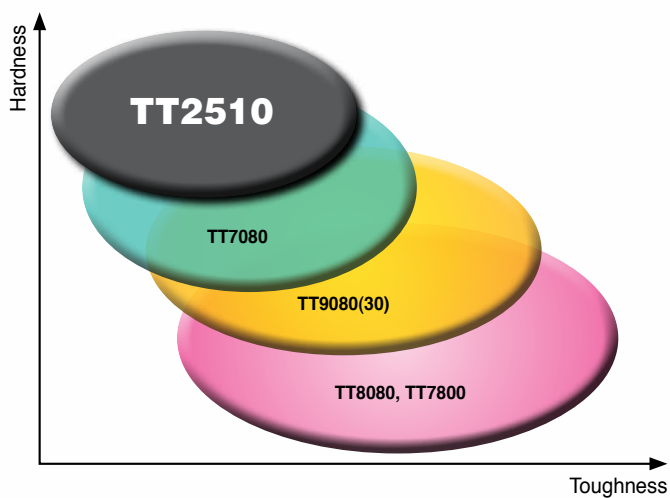

- Medium to high speed machining
- Hardened & pre-hardened steel (< HRC 65)
- Ultra fine substrate
- Excellent wear resistance

Application of insert grades – Finishing (FineBall)

Application of insert grades - Roughing
